

Information Sheet

MFI Fleet Services

MFI's reputation with fleet customers is for well designed, robust, service bodies that work well for their business; service bodies that present excellent value and provide an excellent return on investment.

Ease of customisation

Every business has its own particular requirements, whether it's operational or particular requirements for safety and compliance, and MFI are the specialists in customisation. Our willingness and capacity to customise is a significant benefit to every client. Others offer options, we offer up to 100% customisation.

High quality repeatable solutions

MFI's design skills and manufacturing technology allow a client's customisation to be skilfully applied and readily absorbed into the manufacturing program. This ensures a consistent, repeatable, high quality result for the client's fleet.

Safety and Regulatory Compliance

Safety and compliance are a given. With 15 years experience and the constant upgrading of our skills and knowledge base safety and compliance are the foundation of every design.

ROPS (AS2294 and AS1636)

MFI are accredited to design and manufacture service bodies with approved roll over protection. ROPS is mandatory in some industries and we urge all clients to consider including this added protection to their specification.

Capacity and Planning

Scheduling is critical for fleet operators and our team understand that. Our program planners are totally focused on meeting the client's delivery requirements.
